

Before your home is treated with a fumigant, all consumable items in unsealed containers (such as food, medicine, pet food, beverages and candy) need to be protected in special bags or removed from the structure. Check with your pest management professional to find out which method is recommended for you.

What to bag or remove

YES, bag or remove these items:

<p>Medicine, tobacco, vitamins and other ingestible pills, supplements and lozenges if not sealed in glass, plastic or metal jars or cans with the original manufacturer's seal intact</p>	<p>Pet food and animal feed in bags and boxes</p>	<p>Any food, feed, drugs and medicines if not sealed in glass, plastic or metal bottles, jars or cans with the original manufacturer's airtight seal intact</p>	<p>Chips, pasta, bread, cereals, rice, cookies, crackers and any other items packaged in plastic, paper or cardboard bags or boxes, even if they have never been opened</p>
			
<p>Beverages, snacks, sauces, drugs, medicines or other items in metallic foil-lined containers such as pouches, boxes or blister packs</p>	<p>Anything in resealable containers, including plastic containers, such as milk, butter, sour cream and cottage cheese</p>	<p>Eggs, fruits, vegetables and any other forms of produce</p>	
			

Don't forget about these items:

- Any food, feed, drugs, tobacco products and medicinals NOT sealed in glass, plastic or metal bottles, jars or cans with the original manufacturer's airtight seal intact.
- Spices without their original manufacturer's airtight seal intact.

Examples to guide you as you prepare for fumigation:

NO need to bag or remove these items:

- Any food, feed, drugs, tobacco products and medicines if **sealed** in glass, plastic or metal bottles, jars or cans with the **original manufacturer's airtight seal** intact (examples: unopened 2-liter soda/pop, liquor, beer or wine bottles).
- Dental hygiene products (including toothpaste, mouthwash, dental adhesives and whitening products).*
- Shampoo and soaps.*
- Cosmetics, including lipstick.*
- All externally applied lotions and ointments.*
- Water and ice cubes.*

*Includes opened containers

Make sure to check:

- Cupboards
- Refrigerator(s)
- Freezer(s)
- Kitchen or dresser drawers where food or medications may be stored
- Nightstands
- Children's rooms
- Office desk drawers
- Medicine cabinet(s)
- Liquor cabinet(s)
- Pantries or bulk food storage areas in the garage or basement

What you'll need

If you're bagging items so they can stay in the home:

- You will use Nylofume® bags, which are specially designed to protect your unsealed food and medicines. They are available from your pest management professional.

If you're removing items from the home, the following might be helpful:

- Plastic containers with lids to store food
- Plastic bins or totes for nonperishables

It is the responsibility of the homeowner to have all items on this checklist done before the crew arrives. Failure to do so may postpone the fumigation. Confirm necessary activities and timing with your pest management professional.

All items such as food, feed, drugs (including tobacco) and medicines not adequately packaged (including those items in refrigerators and freezers) must either be removed from the structure being fumigated or sealed in protective Nylofume® bags. The Nylofume bags should be "doubled-up" before you fill them with items that need protection.

Please follow these instructions carefully

1. While bags are still empty, place one inside another. Double-bagging helps ensure effective protection.

2. Place items inside the inner bag. Do NOT overfill — leave clearance on top for adequate closure of the bags.

3. Twist the top of the inner bag.

4. Fold once and secure the fold in place by using tape or a twist tie.

5. Repeat Steps 3 and 4 with the outer bag.

6. Check the seal by pressing gently against the sides of the bag and listening for air leaks. No air should be able to escape.
