How did you do?

- If you didn't get the correct answer with at least **80 of 100** questions (**80%**), I'd suggest that you review this power point presentation several times and study the materials provided in the General Standards sections of the Preparation Manual with which you have been provided.

Many applicants who take the GA certification exam fail to score well on questions coming from the RULES OF THE STRUCTURAL PEST CONTROL COMMISSION.

I would suggest you to understand and know the RULES...not just learn enough to pass the certification exam, but to become a better PCO. If you become a Designated Certified Operator in the future, your knowledge of the RULES will help you train your employees and keep your company in compliance.
