

Use of this Study Guide

- If you are only taking the **HPC category Certification Exam**, you will need to study **Sections 1-5** for questions regarding the 100 questions you will have on the **General Standards section**. You will also need to study **Sections 6+7** for the 100 questions you will have on the **HPC category**.
- If you are only taking the **WDO category Certification Exam**, you will need to study **Sections 1-5** for questions regarding the 100 questions you will have on the **General Standards section**. You will also need to study **Sections 8-10** for the 100 questions you will have on the **WDO category**.
- If you are taking both the **HPC & WDO categories of the Certification Exam**, you will need to study the **entire book**.
- I would strongly recommend that you go over all of the **Power Point Presentations on the CD** that are relevant to the categories of the exam/s that you plan to take.
- Don't just study the Questions and Answers on the Practice Tests. **Study the information.** The questions on the Certification exams will vary in content and the manner in which they are worded. **Some questions will be True/False questions and some will be Multiple Choice questions.**

GOOD LUCK!
